

S-Series DVRT Client Software Quiz

1. The "Client Setup Tutorial" provides detailed instructions on how to:
 - (a) install the S-Series Client Software
 - (b) setup the S-Series Client Software
 - (c) use the S-Series Client Software
 - (d) all of the above
 - (e) none of the above

2. The Client Software is installed from:
 - (a) the internet site www.cascadiadvrt.com
 - (b) the Server Software
 - (c) the Cascadia Web/Product CD
 - (d) both (a) and (c)
 - (e) all of the above

3. Each DVRT Model has it's own webpage on the Cascadia Web CD and on the internet.
 - (a) True
 - (b) False

4. Each DVRT webpage has a download button for:
 - (a) Client Software
 - (b) Multi-Client Software
 - (c) External Player Software
 - (d) Watermark Software
 - (e) PDA Client Software
 - (f) all of the above

5. Left clicking the Download Software "Client" button:
 - (a) opens the "File Download" window
 - (b) automatically downloads the Client Software
 - (c) automatically installs the Client Software
 - (d) all of the above
 - (e) none of the above

6. From Cascadia's website, you can download the Client Software from the DVRT's webpage, the "Downloads" webpage or from the "Support" webpage.
 - (a) True
 - (b) False

7. One way to download/install the Client Software is to:
 - (a) left click the Download Software "Client" button
 - (b) left click "Open" to open the file
 - (c) double-left click the "Client Folder" to expose the rest of the files within the folder
 - (d) double-left click "Setup" to begin the client installation process
 - (e) all of the above

S-Series DVRT Client Software Quiz

8. The InstallShield Wizard will install the "DVSS4Client" Software on your local computer.
 - (a) True
 - (b) False

9. Which is true when choosing the components to Install from the InstallShield Wizard:
 - (a) Add to Startup Menu - Automatically starts the program when the PC is turned on
 - (b) Add a Program Folder - Adds the program to the Start/Show all programs list
 - (c) Add a Desktop Folder - Adds the "DVSS4Client" icon to your desktop
 - (d) both (a) and (c)
 - (e) all of the above

10. The "DVSS4Client" icon cannot be moved.
 - (a) True
 - (b) False

11. The Client Software is opened by:
 - (a) double-left clicking the "DVSS4Client" icon
 - (b) left clicking the "DVSS4Client" icon
 - (c) right clicking the "DVSS4Client" icon
 - (d) all of the above
 - (e) none of the above

12. To connect to a DVRT from the Client Software on a Local Area Network (LAN):
 - (a) the DVRT and the Client PC must be connected to the LAN
 - (b) the DVRT and the Client PC must be assigned a Local IP Address
 - (c) the Client Software must be programmed to connect to the DVRT Software
 - (d) the user name and password from the client must match an active user name and password in the DVRT
 - (e) all of the above

13. To connect to a DVRT from the Client Software over a Wide Area Network (using the internet) behind a router:
 - (a) the DVRT must have a fixed IP Address
 - (b) the Connection, Video and Audio Ports must be forwarded to the DVRT
 - (c) the DVRT must be registered with the Cascadia DNS Server
 - (d) both (a) and (b)
 - (e) all of the above

S-Series DVRT Client Software Quiz

14. The "Client Systems Setup" window is where:
 - (a) the recording drive for the Client is setup
 - (b) the Client System Log is accessed
 - (c) the Client Event Log is accessed
 - (d) Smart Update can be set to update the Client Software automatically when the program is started
 - (e) all of the above

15. When the selected drive has been applied as the recording drive, you are notified by e-mail the setting was done successfully.
 - (a) True
 - (b) False

16. The "Event Log" shows when the Client Software was started and the IP address of the DVRT with which it connected.
 - (a) True
 - (b) False

17. The following event types can be logged in the Client Software:
 - (a) Motion Events
 - (b) Digital Inputs (Alarm Inputs)
 - (c) Video Loss
 - (d) all of the above
 - (e) none of the above

18. Event Log recording is setup from the:
 - (a) "Client System Setup" window
 - (b) "Client Option Settings" window
 - (c) "Server List Management" window
 - (d) any of the above
 - (e) none of the above

19. The "Use Smart Update" box and the "Execute Smart-Update now" icon button are used to update the "Client System Setup" settings.
 - (a) True
 - (b) False

20. In the "Client Option Setting" window, the "Display Rotate Time" controls the dwell time of the rotation of the recorded images on the DVRT.
 - (a) True
 - (b) False

S-Series DVRT Client Software Quiz

21. The "Display Camera Name" option turns On or Off the display of the camera name within the images - during live mode and playback.
 - (a) True
 - (b) False

22. The "Display Frame View (sec)" option turns On or Off the display of the number of frames per second being transmitted from the DVRT. (This is the camera refresh rate.)
 - (a) True
 - (b) False

23. The "Event Log Recording" option activates the Client Software to record events from the DVRT to the Client Software Event Log.
 - (a) True
 - (b) False

24. Voice Network is where the 2-Way Voice (voice communication) option is enabled.
 - (a) True
 - (b) False

25. When the voice network is used for the first time, the Sound Hardware Test Wizard opens automatically and the sound wizard tests your sound hardware to make sure it can play sounds and capture your voice.
 - (a) True
 - (b) False

26. The Client Software "User Name" cannot be changed from the default name "General".
 - (a) True
 - (b) False

27. The Client Software "User Name" is displayed on the DVRT when the client connects to the DVRT and activates voice communication.
 - (a) True
 - (b) False

28. The Voice Network has the ability to create a conversation environment not only directly to the DVRT but also, with other PC's using the Client Software which are connected to the DVRT simultaneously.
 - (a) True
 - (b) False

29. The "Transmit voice upon 1:1 voice call" automatically connects the DVRT in full duplex mode when the DVRT is setup to receive a full duplex call.
 - (a) True
 - (b) False

S-Series DVRT Client Software Quiz

30. When recording from the client, you can only record the channels which are displayed.
- (a) True
 - (b) False
31. While connected to the DVRT, the Client Software can monitor Motion Detection (Alarm Events) from any or all of the cameras simultaneously, while viewing live cameras or searching recorded video.
- (a) True
 - (b) False
32. When motion is detected the Client Software can:
- (a) pop up the associated camera full screen for a specified duration
 - (b) display video loss information instantly
 - (c) play a wave file (sound) of your choice
 - (d) both (a) and (c)
 - (e) all of the above
33. Checking the "Auto Login After Disconnected" box will automatically have the Client connect to the DVRT if it is ever disconnected.
- (a) True
 - (b) False
34. The Remote Image Quality can be adjusted.
- (a) True
 - (b) False
35. Connections to the remote DVRT's are setup in the Server List Management window.
- (a) True
 - (b) False
36. The "Server Name" appears in the drop-down list from the "Connect Server Icon".
- (a) True
 - (b) False
37. The "Address or ID" is where the:
- (a) DVRT's DDNS Name is entered when it is registered with the DDNS Server
 - (b) DVRT's IP Address is entered when a DDNS connection is not used
 - (c) IP Address of the Client PC is entered
 - (d) both (a) and (b)
 - (e) all of the above

S-Series DVRT Client Software Quiz

38. The "Port" is the Connection and Video Port and must be matched to the LAN Port of the DVRT. (default is 8100)
- (a) True
 - (b) False
39. To open the connection window:
- (a) right click the Connect Server button
 - (b) left click the Connect Server button
 - (c) (a) or (b)
 - (d) (a) then (b)
 - (e) none of the above
40. To connect to a DVRT:
- (a) select the DVRT (Server) you would like to connect to from the drop down list
 - (b) enter a user ID (Default Administrator)
 - (c) enter a PASSWORD (Default Administrator)
 - (d) left click the "Connect" button to connect to the DVRT (Server).
 - (e) all of the above
41. After connecting to the remote DVRT, camera views (positions) can be changed using the screen divisions.
- (a) True
 - (b) False
42. The numbered buttons beside the Camera Icon display:
- (a) the cameras available from the DVRT
 - (b) unavailable cameras are dark blue
 - (c) available cameras are bright blue
 - (d) both (a) and (b)
 - (e) all of the above
43. The numbered buttons beside the Check Icon:
- (a) enable and disable live viewing of cameras from the Client Software
 - (b) bright blue cameras are available and disabled
 - (c) purple cameras are available and enabled
 - (d) left click a camera number to enable or disable live viewing
 - (e) all of the above
44. The numbered buttons beside the Audio Icon display information about real-time audio:
- (a) selecting another channel of audio, turns off the previous channel automatically
 - (b) bright blue numbers indicate live audio is available
 - (c) purple numbers indicates the live audio channel playing
 - (d) (b) and (c)
 - (e) all of the above

S-Series DVRT Client Software Quiz

45. From the Client Software, you can only listen to one channel of live audio at a time.
(a) True
(b) False
46. Pan / Tilt / Zoom cameras can be controlled from the Client Software.
(a) True
(b) False
47. Pan / Tilt / Zoom cameras can be controlled from the Client Software:
(a) select a camera with a Pan/Tilt enabled (Left click the Image w/ [P/T])
(b) Pan/Tilt controls point the camera to the desired position
(c) right clicking the Image moves the camera to the area clicked on
(d) (a) and (b)
(e) all of the above
48. Pan/Tilt cameras can also be zoomed and focused from the Client Software.
(a) True
(b) False
49. The "Current Image Recording" Icon:
(a) records video on the Client PC
(b) recording preferences are setup in the Client Options Settings
(c) the client PC will continue to record until this feature is turned off
(d) left clicking the Icon again will stop the recording process
(e) all of the above
50. The "Playback" Icon automatically opens Local Playback Setup:
(a) True
(b) False
51. Network Playback is used to view video recorded on the Local PC from the Client PC.
(a) True
(b) False
52. Play the recorded video by:
(a) selecting a day from the Calendar
(b) select the camera/cameras to playback
(c) select the time from the table (in 10 minute increments)
(d) left click the camera icon on the bottom to go to the selected time
(e) all of the above

S-Series DVRT Client Software Quiz

53. The Recording Time Chart displays the recorded video and following types of recording:
- (a) FPS recording is green
 - (b) Motion recording is blue
 - (c) Sensor recording is orange
 - (d) Emergency recording is pink
 - (e) all of the above
54. The "Check All Channels" box enables all cameras to be played back simultaneously.
- (a) True
 - (b) False
55. Individual or groups of cameras can be selected to playback.
- (a) True
 - (b) False
56. Record Source allows you to choose to playback video from the DVRT (Network Record Data) or from the Local PC (Client Record Data).
- (a) True
 - (b) False
57. Which of the following can be viewed on the images (video) during playback:
- (a) Video Resolution
 - (b) CODEC Type
 - (c) Recording Type
 - (d) all or any combination
 - (e) all of the above
58. Checking the "Audio (A/V Sync vary according to the network)" feature synchronizes the audio and video according to the network automatically.
- (a) True
 - (b) False
59. When listening to the audio typically lags behind the video by approximately "1" second.
- (a) True
 - (b) False
60. The Local Playback Setup window is displayed when you check the "Client Record Data" box.
- (a) True
 - (b) False
61. Local Playback is used to view video recorded on the Network DVRT from the Client Software.
- (a) True
 - (b) False

S-Series DVRT Client Software Quiz

62. The Recorded Server List displays the IP Address of the DVRT from which the video was recorded. (List of IP Addresses with video recorded to the Local PC).
- (a) True
 - (b) False
63. The video recorded from the DVRT (Server) at the IP Address selected will be displayed in the Recording Time Chart.
- (a) True
 - (b) False
64. Any time video is displayed in the Recording Time Chart, you can left click the specific time within 10 minute intervals and play the video from the specific point.
- (a) True
 - (b) False
65. When the video begins playing, you can control it by using the Playback Controls:
- (a) Play Forward, Play Backward
 - (b) Beginning of Hour, End of Hour
 - (c) Forward one frame, Backward one frame
 - (d) Pause and Stop
 - (e) all of the above
66. Once locating the video, you can Print the image and/or Save the image by using Print Image button or the Save Image button.
- (a) True
 - (b) False
67. The "Go to" button takes you to the time selected in the Recording Time Chart in Network Playback Setup or in Local Playback Setup.
- (a) True
 - (b) False
68. The "X" button closes the Network Playback Setup or the Local Playback Setup window.
- (a) True
 - (b) False
69. Left clicking the Exit button in Network Playback Setup or in Local Playback Setup, returns you to the live view (mode).
- (a) True
 - (b) False
70. Left click the Voice Communication button to open the Two-Way Voice window.
- (a) True
 - (b) False
